

the 1990s, the number of people in the world who are poor has increased by 1 billion.

There are many reasons for this. One is that the world's population has grown by 1 billion in the last 20 years. Another is that the world's economy has grown by 1 billion in the last 20 years. But the most important reason is that the world's resources have been used up. The world's forests have been cut down. The world's oceans have been overfished. The world's rivers have been polluted. The world's air has been contaminated. The world's land has been degraded. The world's people have been exploited. The world's future has been threatened.

But there is hope. There are many people who are working to make the world a better place. There are many people who are fighting for justice. There are many people who are trying to make the world a more sustainable place. There are many people who are trying to make the world a more peaceful place. There are many people who are trying to make the world a more just place.
